FE-132AD

FE-131AD

Las incubadoras Felisa® con control digital microcontrolado, sistema "Auto-tunning", hasta 16 perfiles de temperatura y control de rampas. Comunicación digital USB mediante software de adquisición de datos y graficado.

Gravity convection or mechanical convection with analog temperature control or microcontrolled digital control. Interior made of stainless steel and exterior made of steel finished in anti-corrosive enamel.

Features

- Microcontrolled digital control with LCD screen, to observe programmed operating temperatures, cycle time and process status.
- Easy programming in the temperature control now incorporated with "Autotunning" system.

- System with security alarms with high and low temperature limits.
- Fault detection system.
- Timer up to 75 hours.
- Up to 16 temperature profiles and ramp control.
- USB digital communication, through graphic and data acquisition software.
- Models with analog temperature control (thermometer required).
- Heating element designed to provide optimal uniformity.
- With air flow regulation.
- Each equipment has two shelves.
